Organic & Biodynamic Wines

An Ode to Gérard Bertrand

Gérard Bertrand brings out the terroirs and heritage of the South of France. It inspires and drives him to create authentic wines with unique characters giving them a “sense of place”. To achieve this quest for excellence while respecting biodiversity, he started out in 1975 in the vineyards at Villamajou Estate in Corbières, France with his father George Bertrand. In 1987 he created the Gérard Bertrand Wine Company.

As a world class French National Rugby championship player, he learned the discipline and drive to develop his own personal methodology to homeopathic conditioning. With this same approach,

he was convinced of the benefits to the vineyards in his geographic location Languedoc and Roussillon, that making wine in harmony with nature through biodynamic, organic and sustainable farming was going to produce exceptional grand cru style wines. From 1987 when he formed his company to present day, he grew from 1 estate sold in France to become a global leader as he now has 16 estates and is sold in 162 countries around the world, all farmed biodynamically. He is a leader in this category and moving forward as we all try to find healthier options in our daily lives, the growth of recognition to a greener lifestyle embodies his method to creating wines full of flavor, length and balance.

Biodynamic wine production uses organic farming methods employing compost as fertilizer and avoiding chemical pesticides in an enclosed environment. Using soil supplements prepared according to Rudolf Steiner’s formulas, following a planting calendar that depends upon astronomical confirmations and treating the earth as “a living and receptive organism” he has achieved this. As a way of certifying his practices he has met the standards by the Demeter Association recognized world-wide as the top certifying body.

We are proud to present his award-winning wines on our vessel and we are sure you will enjoy them with us and for many years to come in your home country too.
